

Green Wave

The Wave Of The Future

***Striving to protect
our natural resources***

Product Specification

Green Wave Biodegradable Products are made of health conscious natural fiber, such as sugarcane, grass and reed plasma. Given that raw materials are available in China, we are able to remain competitive without exploiting the natural environment or disturbing the ecological system. Therefore the product is a total green product and is the best substitute for non-environmental friendly products, such as Styrofoam & Plastic.

The biodegradable container packaging material consists of 3 major contents of ingredients, 96% natural fibers, 2.3% water and a biodegradable mixture. It can withstand hot and cold food, unlike traditional rigid packaging. Our Green Wave products are biodegradable in water, soil, and compostable material.

Our environmentally friendly products are especially designed to cope with today's ecology issues. The product has been produced with substances that are sustainable and flexible in meeting different designs and formats.

Benefits

- Biodegradable
- Microwavable
- Waterproof and Oil-proof
- Non-toxic
- Recyclable
- Natural
- 302°F / Water 212°F
